Flexible, Scalable, Affordable Network Access Options:

ANEXIO's network is powered by our new state-of-the-art IP backbone. It was purpose built from the ground up with your data in mind. Our engineers have designed a self-healing, highly secure and extremely fast network with direct connections to more network providers than ever before. Your data will travel on the fastest and least congested path possible.

DEDICATED INTERNET ACCESS: Burstable or Fixed rate service available in all locations on Fast Ethernet, GigEthernet or 10/40/100GB Ethernet. Redundancy via HSRP, BGP, or VRRP.

MPLS: MPLS Optimized transport available in multiple configuration options designed to meet your needs and exceed your expectations.

METRO & LONG HAUL ETHERNET: Dedicated Layer 2 transport services in and out of market. Layer 2 services are provided on standard fixed rate ethernet circuits. Q-in-Q support available.

DIRECT CONNECT: Direct physical connection to AWS, MS Azure, Google, HP, IBM, and others.

LAN DESIGN & MANAGEMENT: Let our skilled team of network professionals help you design, implement and manage your network infrastructure.
