ANEXIO LightSpeed

Connectivity Options

ANEXIO LightSpeed for Colocation:

Dedicated, scalable and redundant Fast Ethernet, Gigabit Ethernet or 10/40/100GB Ethernet internet access in any ANEXIO data center.

ANEXIO LightSpeed for Data Centers:

Point-to-point connection between a customer's rack, cabinet or cage in two or more ANEXIO Data Centers.

ANEXIO LightSpeed for Offices:

Point-to-Point connection between a customer's office locations and their Data Center environment.

ANEXIO LightSpeed for Cloud:

Direct connection from any Data Center or office location to industry-leading public Cloud providers such as AWS, Microsoft Azure, Google, HP and IBM SoftLayer. Services supported:

Hybrid Cloud: Directly connects a customer's on-premise computing environment or office location with the ANEXIO cloud or another third-party cloud services provider.

Private Cloud: Secure access between a customer's dedicated or virtual private cloud and an ANEXIO Data Center.

What is ANEXIO LightSpeed?

ANEXIO LightSpeed is our world-class Tier II network offering burstable or fixed rate Dedicated Internet Access and MPLS services up to 100 gigabits per second.

The best-in-class carrier grade ANEXIO LightSpeed network is powered by the combination of the company's DWDM (Metro Dense Wavelength Division Multiplexing) backbone, MPLS (Multiprotocol Label Switching) techniques and LISP (Location Identifier Separation Protocol) routing and addressing architecture to create a self-healing, highly secure, low latency and extremely fast network.

ANEXIO's network is powered by our new state-of-the-art IP backbone. It was purpose built from the ground up with your data in mind. Our network engineers are leveraging direct connections to more network providers than ever before. Your data will travel on the fastest and least congested path possible.

Flexible, Scalable, Affordable Network Access Options:

DEDICATED INTERNET ACCESS

Burstable or Fixed rate service available in all locations on Fast Ethernet, GigEthernet or10/40/100GB Ethernet. Redundancy via HSRP, BGP, or VRRP.

MPLS

MPLS Optimized transport available in multiple configuration options designed to meet your needs and exceed your expectations.

METRO & LONG HAUL ETHERNET

Dedicated Layer 2 transport services in and out of market. Layer 2 services are provided on standard fixed rate ethernet circuits. Q-in-Q support available.

DIRECT CONNECT

Direct physical connection to AWS, MS Azure, Google, HP, IBM, and others.

LAN DESIGN & MANAGEMENT

Let our skilled team of network professionals help you design, implement and manage your network infrastructure.

Customer Support

ANEXIO pairs its high-performance network with available round-the-clock customer support. The company's skilled team of network professionals help customers design, implement and manage their network infrastructure. ANEXIO's multiple peering points and transport options allow organizations to purchase exactly what they need at an affordable price, with the ability to scale up or down as their business dictates.

About ANEXIO

ANEXIO is transforming the IT industry with Desktop to Data Center solutions designed specifically for enterprises worldwide. The company's state-of-the-art offerings provide unlimited capacity for scalable growth, elevating its clients to global players. With ANEXIO, businesses have access to the most advanced technology solutions and its partners become global players. Visit www.anexio.com for more information.
