

Performance. Reliability. Stability.

Facilities

- Ashburn, VA (ACC4): 150,000 sq. ft.
- Ashburn, VA (ACC5): 140,000 sq. ft.
- Ashburn, VA (VA1): 150,000 sq ft
- Reston, VA (VA3): 125,000 sq ft
- Piscataway, NJ (NJ1): 130,000 sq ft.
- Los Angeles, CA (LAX6): 67,000 sq ft.
- El Segundo, CA (LAX4): 132,240 sq ft.
- Sacramento, CA (CA1): 250,000 sq ft
- Close to multiple major airports

Power

- Critical IT load: ACC4: 14.4MW, ACC5: 14MW, VA3: 12.2MW, NJ1: 15MW, CA1: 14.4MW, VA1: 12.6MW, LAX4: 13.5MW, LAX6: 27MW
- Scalable up to 25 kW per rack
- Concurrently maintainable and fault tolerant
- Highly intelligent and self-healing infrastructure management system integrated into Operations Control Center monitoring system

High Performance Data Centers

Robust power, connectivity, and cooling with layer after layer of redundancy. ANEXIO data centers offer the flexibility, scalability, and the security you crave. Customizable data center solutions from 1U to up to private cages for hundreds of racks, all with optional biometrics and video surveillance. And because ANEXIO provides the network, hosting, cloud and professional services all in the same data center, you have direct access to virtually unlimited resources to help support your environment.

100% Availability with 2N+2 Redundancy

ANEXIO's 100% uptime SLA is unique in the data center industry. Our robust infrastructure systems go beyond industry-standard N+1 redundancy to an impenetrable 2N+2 redundancy, with the ability to support ultra-high power densities up to 22 kW per rack.

Route Optimized Secure Networks

ANEXIO exclusively operates carrier neutral data centers, because we believe that when it comes to choosing your telecommunications provider, choice is everything. And we give you lots of freedom to choose - our Reston, Ashburn and New York Metro data center campuses have a multitude of local, regional, and national fiber providers built in to our facilities.

Plug & Play Access

ANEXIO's highly customizable colocation solutions are designed to meet the fast-paced demands of your business' mission critical IT systems. Our next generation, powerhouse critical infrastructure and immense network connectivity options allow flexible and fast deployment of your secure, private caged environment or cabinet.

ACC4, located in Ashburn, VA

Data Center Solutions

- Dual authentication security access
- Biometric and card access controls
- 24x7 onsite security team
- N+2 feeder capacity
- 2N redundant service delivered at 13.2KV
- 64 MW of back up emergency generator capacity
- Ample emergency fuel supply
- SOC-II SSAE-16 certified facility

Cooling

- Scalable beyond 260 watts per square foot
- 100% availability
- Centralized industrial chiller plant with automatic controls to maximize operating efficiency and PUE
- Computer room air handlers at N+2 redundancy or better

Security

- In-house security staff
- Multifactor identification and multi-level security zones
- Digital pan-tilt-zoom cameras that monitor all data center secure areas, parking lots, entrances and roof monitored at all times by 24x7x365 security staff

Connectivity

- Burstable or Fixed rate service available in all locations on Fast Ethernet, GigEthernet or 10/40/100 GB Ethernet.
- Redundancy via BGP, HSRP or VRRP.
